The Chin National Front's Policy on Neighbouring Countries

As a revolutionary organization working for the interest and welfare of the Chin people, the Chin National Front (CNF) is constantly trying its best to advance its stated objectives towards the achievement of federalism, self-determination and democracy in Union of Burma.

In this context, CNF encourages individuals and organization of our Chin people, both domestically and in the diaspora communities, to refrain from activities that interfere with domestic politics of neighbouring countries. These include trying to obtain or fraudulently acquire identity cards of foreign countries, and or engaging in illegal activities that may harm law and order in the country in which they seek refuge.

CNF and its allies will not tolerate trafficking or illegal smuggling of any items, especially narcotics into our immediate neighbors. We commit to ensuring that there is a friendly and safe environment in which we can live and maintain friendly relations with our immediate neighbors.

Any activities or actions that may result in harmful effects for our people will be deemed unacceptable and necessary actions taken for such.
