Statement in Commemoration of the 77th Chin National Day

1. Today, February 20th, 2025, marks the 77th Chin National Day, which is a historic landmark for the Chin people, demonstrating our national unity as a nation, and commemorates the national movement against colonial rule and for national liberation, as well as the historic political decision made by the Chin leaders to transition from the traditional hereditary governance systems of their respective clans and regions to a democratic system based on the self-determination for all Chin people.
2. On this special occasion, we solemnly express our respect and gratitude to the heroic martyrs who sacrificed their lives in the ongoing people's revolution with a pride national victory to end all forms of dictatorship and establish a federal union. We honor and salute the comrades who sacrificed their lives, and we share our deepest sympathy and understanding for the suffering endured by the people due to the military council's acts of terrorism.
3. The Chin National Front, in accordance with the Chinland Constitution (2023), is committed to strengthening the Chinland Council, the Chinland Government, the Chinland Parliament, and the Judiciary system. Based on the 1947 Panglong Agreement, we will work to prevent the disintegration of the Union and strive to rebuild a federal union that guarantees equal political rights and self-determination for all nationalities. We will steadfastly build our military and political capabilities in a balanced manner, and fight to the end in cooperation with allied ethnic armed organizations, other partners, and international governments, with shared beliefs and goals.
4. We will maintain "military and political vigilance" regarding the SAC's malicious political maneuvers and military acts of terror, who incur a general crisis due to the military and political repercussions of the strong people's revolution during the past four years. We will continue to fight alongside our allied revolutionary forces for the complete eradication of the terrorist SAC forces within Chinland, and ultimately, the annihilation of the current military at the nationwide level.
5. Taking lessons from the political losses we have endured in the past, responsibility have been bestowed on our shoulders to ensure that future generations do not suffer the bitter legacy of dictatorship. Therefore, with a deep understanding of the current military and political realities in Chinland during this revolution, and free from the centric of tribalism, regionalism and party/organization with a distinction between "primary and secondary" issues, we must build strong trust among revolutionary forces and fight together. On this occasion of the 77th Chin National Day, we urge and encourage everyone and Chin community around the world to celebrate with the true spirit of national political significance.
